ACCOMPLISHMENT REPORT
for **March 16 - 31, 2024**

Objective: User Management Information System:

- Version Control Implementation:
  - Successfully implemented version control system for code management, enhancing collaboration and tracking changes effectively.
- Integration of Leave Application Display:
  - Integrated leave application display on the DTR, providing employees with visibility into their leave status directly from the DTR interface.
- Integration of Official Business Application Display:
  - Integrated official business application display on the DTR, allowing employees to view their official business applications conveniently.
- Integration of Official Time Application Display:
  - Integrated official time application display on the DTR, enabling employees to monitor their official time applications seamlessly.
- Modification of Generate DTR Process:
  - Modified the DTR generation process to accommodate all application displays, including holidays, leaves, and other applications.
  - Implemented prioritization logic to ensure that leave applications are prioritized if they exist, enhancing accuracy and reliability.
